

Sample Presentation

Touying Basic Theme

Randy Ridenour

Department of Philosophy

July 19, 2026

Components

Components

Basic Theme

- Simple theme for Touying
- Uses sections and optional subsections
- White, black, and gray color variants

Components

This is a speaker note viewable on second screen.

Touying-Scaffold

- Provides Emacs command to generate an initial presentation template
- Asks for desired directory
- Creates folder and files
- Opens content file in Org mode

Components

Ox-Touying

- Custom exporter
- Exports `talk.org` to `content.typ`

Components

When using Org mode, `content.typ` is never directly edited.

Creating a Presentation

Emacs Command

- `M-x rlr/new-touying-presentation`
- Asks for title and folder
- Creates folder with files

Creating a Presentation

Files

1. `talk.org`
2. `content.typ`
3. `config.typ`
4. `<slug>-slides.typ`
5. `<slug>-handout.typ`

Creating a Presentation

1. Org mode content file
2. Typst content file (not edited)
3. Configuration file (edited only to change color, logo, and sectioning)
4. File compiled to produce slides
5. File compiled to produce handout

Writing Content

- Headings
 - Level 1: sections
 - Level 2: subsections or slide titles
 - Level 3: slide titles
- Other text: slide content

Creating a Presentation

- Headings make the section slides, subsection slides, and slide titles.
- Text below a slide title becomes slide content.

Revealing Content

- Use @@typst:#pause@@

Revealing Content

- Use `@@typst:#pause@@`
- Functions like the Beamer `\pause` command

Tables

Group	X	Y	Z
A	+5	-3	0
B	-2	+1	+1
C	-1	+3	-2
Total	+2	+1	-1

Creating a Presentation

- Plain Org tables become #table(...)
- No automatic header bolding
- #+ATTR_TYPSST overrides columns, stroke, alignment

Layout Blocks

- Used for special cases
 - Two-column slides
 - Full frame slides with no titles
 - Slides with a short main point centered in the slide

Creating a Presentation

Code examples for each are included in the handout.

Two Column

- **Column A**
- Text

- **Column B**
- Text

Creating a Presentation

- Wrapped in begin/end blocks
- Next slide: full-frame image

Creating a Presentation

Full-frame image, no title, no margins

Main Point Slides

Creating a Presentation

- Big centered statement slide

Finishing

Finishing

Compiling

- Options

- `typst compile` **shell command**
- Custom shell command
- **Emacs function**

Finishing

Code is included in the handout.
